Custom Work

One of Longchamps Architecturals Inc.'s most precious assets is in the area of custom sculpting and pattern making. We have built a solid reputation based on our abilities to shape the minute splendors of an Acanthus leaf to constructing the grandeur of a large coffered dome.

Our areas of specialty consist of:

Sculptures

Pattern-making

Restorations

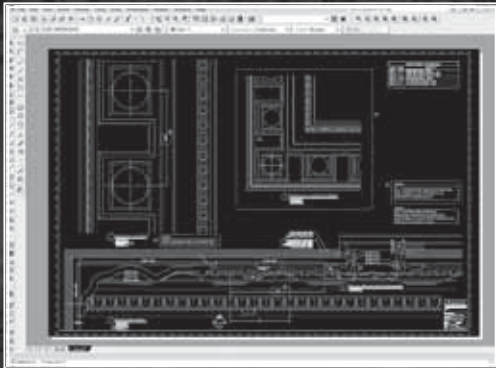

Renovations

Our systematic approach to custom work develops in 4 stages:
Concept, Engineering, Sculpting and Production.

Concept

Virtually anything from a painting, a photo, an artifact or even a general idea can skillfully be molded in plaster.

Engineering

Your concept is drawn using advanced CAD software and devices to accurately detail shapes, curves, angles, repetitions and measurements.

Sculpting

Our finest sculptors engage their mastery and skill in creating the concept.

Using renderings and CAD drawings matched with our exceptional artistic techniques we can produce endless possibilities that create your distinctive masterpieces.

Production

Once a silicone mold or running steel is made, our expert craftsmen manufacture your parts using special moulding plaster and sufficiently reinforce it with strong supporting materials such as fiberglass and burlap.

Final Product

Sculptures produced from a painting

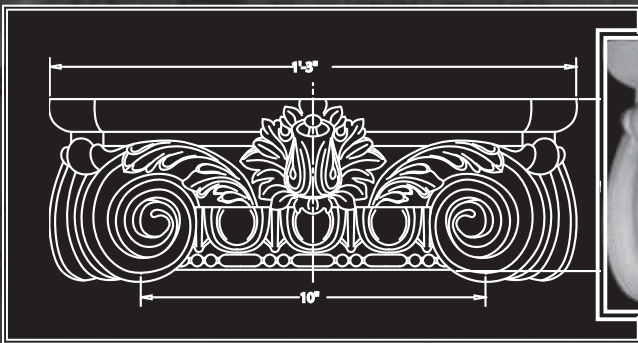

A partial of an entire room replicated from a photograph

A reproduction of a frieze from a book

An Ionic Capital sculpted from a CAD drawing
